EDUCATION

- **University of Michigan**

Ann Arbor, MI

Bachelor of Science in Computer Science - GPA: 3.4

July 2020 - Present

Courses: *Data Structures and Algorithms, Discrete Mathematics, Statistics & Data Analysis, Physics I Mechanics, Calculus 1 & 2*

SKILLS

- **Languages:** C/C++, Python, JavaScript, MATLAB, RStudio
- **Frameworks:** React.js
- **Platforms:** Windows, Linux, Raspberry Pi

EXPERIENCE

- **iD Tech** (idtech.com)

Remote

- *Online Instructor (Part-time)*

June 2021 - August 2021

- Worked as an online instructor gaining leadership experience while teaching two programming courses per week to **5-7 students** per class.
 - Introduced many topics in computer science and helped students complete 3-4 projects.
 - Classes: **coding applications and game design with C++** and **machine learning/artificial intelligence with Python**.

- **Simulation Players** (simulationplayers.io)

Remote

- *Lead Software Developer (Full-time)*

October 2021 - Present

- Working as the lead software developer, for the Instagram artist [@Leollii](#), on his NFT collection.
 - Created a website (simulationplayers.io) using **Next.js** and **Tailwind CSS**.
 - Created an **Ethereum Smart Contract** on **Ethereum Mainnet** using **Solana** for the NFT collection.
 - Created a **Minting Dapp** on the website utilizing the **Opensea.io api** and **JavaScript** to allow users to mint NFT's in the collection.
 - Created a **randomized NFT generator (JavaScript)** to randomly generate 5,000 NFT images and metadata based on layers of artwork given to me by the artist [@Leollii](#).

PROJECTS

- **Image Processing: Seam Carving Algorithm**

- A C++ application that utilizes the seam carving algorithm to intelligently resize images to desired height and width.

- **Piazza Post Classifier**

- An application created with C++ that learns to classify 1000+ piazza posts with certain labels using machine learning through Bayes' Rule and binary search trees.

- **Office Hours Queue Website**

- A small web server for an office hours queue, this C++ application utilized linked lists to create the queues.

INVOLVEMENT

- **Michigan Neuroprosthetics** (umneuroprosthetics.org)

September 2021 - Present

- Programming Arduino Pro Mini 328 to control a prosthetic arm through various methods/modes.
